The status of the claims is as follows:

Claims 13, 14, and 17 have been cancelled; and

Claims 1-12 and 15-16 are herein addressed below.

The proposed drawing corrections dated 11/5/2008 have been approved by the Examiner.

Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, line 2, the applicant recites "a pair of guide tracks" and throughout the claims, the applicant's amendments recite "the pair of pane guides". Are these one in the same?

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-12 and 15-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Hisano et al. (5,964,063). As shown in detail below, Hisano et al. (5,964,063) disclose a window frame and method thereof (24) for a motor vehicle door fitted with a

window lift having a drum motor (70), drive catches (94, 96), a pair of guide tracks (46 and 48), a window pane (32) being inserted within a hollow portion of the door (22', see Figure 7a, forms a box), two cross elements (42 and 36), one longitudinal element (34), wherein the window frame (24) is inserted and fitted within a hollow portion (see Figure 7a) and attached to end faces (30, best seen in figure 7a) of the door (22'). Hisano et al. (5,964,063) further disclose a Bowden cable drive (78) in the form of a figure 8, seals (see Figure 9) attached to the window frame, and a support for a side-view mirror.

Applicant's arguments with respect to claims 1-12 and 15-16 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
